PROFESSIONAL SUMMARY

Full-stack software developer with 4+ years of commercial experience building and shipping production web applications and e-commerce platforms. Proven expertise in React/TypeScript frontends and ASP.NET Core APIs, with hands-on experience in payment integrations, REST API design, CI/CD pipelines, and Agile delivery. Consistently delivering clean, tested, maintainable code in cross-functional teams.

EXPERIENCE

Full-Stack Software Developer Jun 2024 – Feb 2026

Net Group OÜ — Tallinn, Estonia

- Developed and maintained a customer-facing business portal using React (TypeScript) and ASP.NET Core, achieving sub-200ms API response times
- Designed and integrated third-party payment processing APIs (Stripe, Montonio), reducing failed transactions by standardising input validation and error handling flows
- Delivered 15+ product features end-to-end across full stack — from UI design to backend APIs to database migrations — in 2-week Agile sprints
- Set up and maintained CI/CD pipelines (GitHub Actions) for automated testing and deployment, cutting release cycle from weekly to daily
- Developed frontend features for a separate Next.js application, building reusable components and integrating with backend REST APIs
- Conducted code reviews for a team of 5 developers; identified and resolved critical security vulnerability in authentication flow
- Collaborated with product managers, designers, and QA engineers in daily standups, sprint planning, and retrospectives

E-Commerce Specialist / Frontend Developer Jun 2022 – Apr 2024

Multon Developments OÜ — Tallinn, Estonia

- Managed and enhanced Magento 2 e-commerce platforms processing 500+ orders per month, maintaining 99.9% uptime
- Implemented responsive frontend components and UI/UX improvements to enhance the mobile user experience
- Integrated third-party plugins and payment gateways, expanding available checkout methods
- Performed website administration, content management, and performance optimisation across 3 client storefronts

Full-Stack Developer Jan 2021 – Oct 2021

OÜ Abtram29 — Tallinn, Estonia

- Built React.js web applications from concept to deployment for internal business tooling
- Developed a one-time password (OTP) authentication system in Java to enhance account security
- Participated in full feature development lifecycle: requirements gathering, coding, unit testing, and deployment

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Java, Python, HTML5, CSS3

Frontend: React, Next.js, Magento 2, Responsive Design, REST API integration

Backend: ASP.NET Core, .NET, Java, Node.js, RESTful API design

Databases: SQL Server, MySQL, PostgreSQL, MongoDB — query optimisation, schema design

DevOps & Cloud: GitHub Actions (CI/CD), Docker (basics), Git, deployment pipelines

Tools & Practices: Jira, VS Code, Agile/Scrum, Code Reviews, Unit Testing, TDD basics

AI & Productivity: AI-assisted development, GitHub Copilot, AI automation tooling

EDUCATION

Vocational Diploma — Software Development 2018 – 2022

Tallinn Polytechnic School

4-year programme that built a strong foundation in coding fundamentals, object-oriented programming, algorithms, databases, software architecture, and modern development practices including CI/CD.

ADDITIONAL INFORMATION

- Location: Based in Tallinn, Estonia
- Languages: Estonian (native), English (professional working proficiency)
